July 2019 Newsletter

Losing "Patience"

All major indices ended up since the last newsletter, with the DJII +4.0% (YTD+14.0%), S&P 500 +4.1% (YTD + 17.3%) and NASDAQ +4.8% (YTD +20.7%).

With the equity markets close to all-time highs, but still exhibiting volatility since the last newsletter, we believe our **EZTracker** model portfolios remain balanced to benefit from incremental bullish sentiment (related to G-20 or better than expected corporate earnings releases). One thing to note: the **EZTracker** Model Portfolios are *not* trading portfolios. They are designed to be long-term focused and are not meant to radically change from month to month chasing the market, as that is not a winning strategy for long-term investors. Please see the "**EZTracker Approach**" on the bottom of Page 3. **There are no changes to any EZTracker Model Portfolios This Month.**

Overall Point - The Difference one Word Makes

June was more or less all about the actions of the US Federal Reserve. Since the S&P's localized low on June 3, it grew 7.2%, mainly due to the expectations surrounding the Fed. Investors consistently bid up the US equity markets since the beginning of the month on a) expectations of a more dovish Fed stance and b) ratification that the revised stance will mean a forthcoming rate cut. At the latest Federal Reserve meeting on Wednesday June 19, the Fed removed the word "**patience**" from its statement, stating instead that it will "act as appropriate" to sustain the US economic expansion. That stance not only gives the Fed some breathing room on policy decisions, but it also suggests that yes, lower interest rates could be around the corner.

International Trade

The other great expectation involved the on-again, off-again, US-China trade skirmish. Investors, looking toward the G-20 meetings in Osaka held on June 28-29, had expected some sort of detente or an "agreement to agree", which expectation also buoyed the equity markets during the month. In what was somewhat of a surprise, on Saturday June 29, Trump and Xi agreed to a full cease-fire on trade in which the US agreed to put off all additional tariffs on Chinese goods indefinitely, and China agreed to start buying large amounts of American farm products. Additionally, curbs on Huawei Technologies will be lifted, although Trump did state that existing tariffs won't be lifted. The markets had priced in some sort of rapprochement, however a truce so quickly was likely not expected. As the announcement came after US markets closed for the weekend on Friday June 28, the immediate market response had not been felt, but equity futures predict a positive market response.

Now what?

The markets have fully factored in a rate cut in July, coupled with the expectation of some sort of US-China truce, and the markets are at or near all-time highs, and remain somewhat volatile. Investors are forced to re-focus on the fundamentals of base economic data (both domestically and globally), and corporate earnings expectations. With fiscal Q2 finishing today (June 30), investors and **EZTracker** will be focused on initial Q2 earnings announcements expected over the next 30 days.

If you are following the Aggressive model portfolio and are concerned about volatility, you're probably not really an aggressive investor. We suggest reviewing your risk tolerance and adjusting your investment strategy if necessary. Commit to a strategy that is consistent with your own risk tolerance and stick with it. Economic Data

The **University of Michigan** said the final reading of its June **Consumer Sentiment Index** was 98.2, down from the 100 reading in May, which decline was mainly attributable to wealthier Americans being rattled by the threatened tariffs.

The June 7 **Jobs Report** showed that wage growth cooled slightly after gaining the previous year, while the national unemployment rate remained at its 49-year low of 3.6%.

New domestic single-family **Home Sales** dropped 7.8 percent in May from the previous month to a seasonally adjusted annual rate of 626 thousand, while markets had forecast a 1.9 percent increase to 680 thousand. That was the lowest level since December despite lower mortgage rates.

Sector Analysis

All sectors were in the black this month, led by Materials (+11.6%), Energy (+9.4%) and Technology (+8.9%). Laggards were defensive sectors such as Real Estate (+1.6%) and Utilities (+3.2%). Technology remains the highest-performing sector YTD, with over 26% return.

Fixed Income

Rates & Yield Curve

The spread between 2-year and 10-year treasuries continued to widen, from 0.17% last month to 0.25%. Much of this widening was caused by the expectation of Fed rate cuts, as traders price in easier monetary policy. With the 10-year Treasury yield under 2%, however, it may be a depressing signal on the markets's opinion of future economic growth.

The EZTracker Approach:

- We don't predict where the market is going - we identify the best performers;
- We use a disciplined approach to investing even during market volatility and uncertainty, and we review portfolios monthly;
- We take a long-term perspective of the market;
- We are consistent in our strategy, the **EZTracker** portfolios have consistently outperformed the market in up and down markets.

The EZTracker Subscriber Approach:

- Avoid emotional extremes. Monitor your risk profile and stick to your plan;
- Stop listening to the talking heads. Not one has demonstrated the ability to predict the market;
- Stay up-to-date and maintain your portfolio on a timely basis.

EZTracker provides three model portfolios for Sun Country Employees; Aggressive, Moderate and Conservative. Each is designed for different investment needs and styles, as well as level of risk tolerance.

STEP 2: Update Future Investment Elections

If you are adding cash to your 401k through payroll deductions, set your Future Contributions identical to your Current Investment in the above **EZTracker** Model Portfolio chart.

All the model portfolios consist of core holdings representing major market segments plus top performers based on current market conditions. Some market conditions may cause us to deviate from the following percentages.

- Aggressive Portfolio:**
95-100% invested in equities. This is a high risk/high reward portfolio.
- Moderate Portfolio:**
70% invested in equities and 30% invested in bonds or Stable Value Fund.
- Conservative Portfolio:**
40% invested in equities and 60% invested in bonds or Stable Value Fund. This is our lowest risk portfolio.

Total Return versus Morningstar Benchmarks YTD

Morningstar Target Risk Index

The Morningstar Target Risk Index series serve as benchmarks to help with investment selections. They cover a global set of stocks, bonds and commodities. While not investable indices, they represent challenging benchmarks for long-term investing plans such as the **EZTracker** model portfolios.

Historical Performance

Any investment strategy should be measured one way: Results over time. Not one-week, one-month, or even one-year. While past performance is not a guarantee of future performance, our record has been excellent in delivering long-term returns. As with any long-term investing strategy, you should not expect dramatic short-term results to offset past losses.

Monthly Fund Data

Below is the current fund performance for the alternatives in the **Sun Country** 401k plan. The “Tracker Average” is a weighted average of performance over the past year and is a key factor in selecting funds for inclusion in the model portfolios.
