Market Resilience Continues for Another Month

On Friday, the S&P 500 index and Nasdaq composite both rose to a record close. Since our last newsletter, DJII +2.2% (YTD+16.6%), S&P 500 +2.9% (YTD + 20.7%) and NASDAQ +4.0% (YTD +25.5%).

The equity markets hit all-time highs this month on the back of 1) hopes that the Fed will elect to cut rates next week; 2) stronger than expected corporate earnings; and 3) incremental progress on US-China trade. The 10-year yield, however, continues to signal a poor commentary on future growth, and short-end interest rates are beginning to look less attractive with the prospect of rate cuts. As such, we are taking this opportunity to adjust our fixed income allocation for **EZTracker** Moderate and Conservative portfolios. **Please see page 4 for portfolio changes.**

Fed Rate Cut Expectations

The Federal Reserve is expected to cut interest rates for the first time in more than a decade at its upcoming meetings on July 30 and 31, a pre-emptive move due to concerns about the impact of the trade war and a slowing global economy. The market has priced in a 25 basis point cut next week, and expects another later this year. Friday's Q2 GDP growth report came in higher than expected at 2.1% (vs. 1.8%), which some fear may tempt the Fed to adopt a less aggressive posture on cutting rates. Although higher than expected, the GDP growth trend is markedly negative-- following 3.1% the previous quarter -- and may be what the Fed needs to truly pull the trigger on a rate cut. Should the Fed signal it may not lower interest rates as much as has been communicated, it will need to say so very delicately. Because the markets expect rate cuts, a signal that the Fed may take less action could have a large impact.

Corporate Earnings

To date, 44% of the companies that make up the S&P 500 have reported Q2 results, and so far the results have been promising. The percentage of firms beating estimated EPS (77%) and beating predicted Sales (61%) are both above the five-year average for each metric. Looking forward to the second half of the year, analysts predict a relative decline in corporate earnings for Q3 followed by mid-single-digit earnings growth in the fourth quarter. During the upcoming week, 168 companies in the S&P 500 (including seven Dow 30 components) are scheduled to report Q2 results. Some noteworthy individual company activity: **Facebook (FB)** gained 2% after the social media giant reported quarterly revenue that beat estimates, but also announced that new rules and product changes aimed at protecting user privacy would slow its revenue growth into next year. **3M Co. (MMM)** rose 4.5% after the manufacturing conglomerate reiterated its full-year earnings forecast despite slowing sales growth in high-profile markets such as China. **Tesla Inc (TSLA)** tumbled 12.3%, after the electric carmaker pushed back its profit timeline once again after missing its quarterly financial targets. **Texas Instruments (TXN)** hinted that a global slowdown in microchip demand would not be as long as feared, which countered bleak earnings from bellwether companies **Boeing** and **Caterpillar**.

Economic Data

Economic data is decidedly mixed, as strong reported employment growth was countered by slowing GDP growth. The July 5 **Jobs Report** showed that job growth rebounded sharply, as employers added 224,000 jobs, a larger figure than expected. The unemployment rate rose slightly, although at 3.7% it remains near a multi decade low.

GDP growth slowed to 2.1% from 3.1% in the prior quarter, reflecting downturns in inventory investment, exports, and non-residential fixed investments.

Sector Analysis

Leaders this month were Communications Services (+6.8%), Technology (+6.1%), Consumer Discretionary (+4.6%), and Consumer Staples (+4.1). Laggards were Energy (-1.6%) and Healthcare (+0.4%).

Fixed Income

The yield on the benchmark 10-year Treasury note has risen about 10 basis points since the last newsletter, closing Friday at 2.074%. As markets are focused on the US Fed, **EZTracker** has been considering the right balances in it's model portfolios taking into an account the general expectation of rate cuts. Bottom line, the bond markets continue to signal medium and long-term economic issues, and while hopes of central bank easing has propelled stocks to new highs, the 10-year yield is signaling a slowdown in future growth. Short-end rates are poised to drop with a rate cut, therefore in certain **EZTracker** model portfolios we are reallocating a portion of our short-term MM/cash/stable value position into longer-dated fixed income securities.

EZTracker Approach:

- We don't predict where the market is going - we identify the best performers;
- We use a disciplined approach to investing even during market volatility and uncertainty, and we review portfolios monthly;
- We take a long-term perspective of the market;
- We are consistent in our strategy, the **EZTracker** portfolios have consistently outperformed the market in up and down markets.

The **EZTracker** Subscriber Approach:

- Avoid emotional extremes. Monitor your risk profile and stick to your plan;
- Stop listening to the talking heads. Not one has demonstrated the ability to predict the market;
- Stay up-to-date and maintain your portfolio on a timely basis.

EZTracker provides three model portfolios for Sun Country Employees; Aggressive, Moderate and Conservative. Each is designed for different investment needs and styles, as well as level of risk tolerance.

STEP 2: Update Future Investment Elections

If you are adding cash to your 401k through payroll deductions, set your Future Contributions identical to your Current Investment in the above **EZTracker** Model Portfolio chart.

All the model portfolios consist of core holdings representing major market segments plus top performers based on current market conditions. Some market conditions may cause us to deviate from the following percentages.

- Aggressive Portfolio:**
95-100% invested in equities. This is a high risk/high reward portfolio.
- Moderate Portfolio:**
70% invested in equities and 30% invested in bonds or Stable Value Fund.
- Conservative Portfolio:**
40% invested in equities and 60% invested in bonds or Stable Value Fund. This is our lowest risk portfolio.

Morningstar Target Risk Index

The Morningstar Target Risk Index series serve as benchmarks to help with investment selections. They cover a global set of stocks, bonds and commodities. While not investable indices, they represent challenging benchmarks for long-term investing plans such as the **EZTracker** model portfolios.

Historical Performance

Any investment strategy should be measured one way: Results over time. Not one-week, one-month, or even one-year. While past performance is not a guarantee of future performance, our record has been excellent in delivering long-term returns. As with any long-term investing strategy, you should not expect dramatic short-term results to offset past losses.

Monthly Fund Data

Below is the current fund performance for the alternatives in the **Sun Country** 401k plan. The “Tracker Average” is a weighted average of performance over the past year and is a key factor in selecting funds for inclusion in the model portfolios.
